

**Overview** — **MediChart Express™** is a powerful tool for medical specialists who need a simple, fast, and detailed electronic medical records and voice recognition solution. Patient encounters can be captured with mouse clicks on drop down menus as well as voice input. Within a few minutes of training, the medical professional can use his/her voice to create an electronic medical record — complete with a history and physical, pharmaceutical and laboratory data, and billing information.

**MediChart Express™**

### Key Features & Benefits

- ▶ Significantly reduces medical reporting time
- ▶ Reduces expenses related to dictation costs while simultaneously decreasing the turnaround time for dictated documents — leading to an overall reduction of healthcare delivery costs
- ▶ Versions are available for a one-physician office to a SQL-based networked multi-room hospital set-up
- ▶ Fully HIPAA compliant with proven 99% dictation accuracy
- ▶ A WSIWYG (what-you-see-is-what-you-get) interface; as you create a report, it incrementally appears on screen
- ▶ A customizable database maintains your list of preferred diagnoses, procedures, referring physicians, support staff, etc.
- ▶ A comprehensive scheduling module allows one or many physicians to create or edit appointments onsite or remotely by modem — and reported on in a variety of formats
- ▶ Automatic generation of a superbill based on the patient record to facilitate confidentially coding at the highest possible level, minimizing the risk of under-coding
- ▶ Records are optionally encrypted and organized by groups and permissions to allow only users with a “need to know” to view them; records are time and date stamped with the user information, and versioned to prevent tampering
- ▶ Includes a large pharmaceutical database and a rich-in-feature prescription module with patient tracking, prescription reporting, and one-step prescription refills
- ▶ Laboratory data can be downloaded, imported electronically, and scanned; both images and reports can be stored, reviewed, and gathered into powerful reports
- ▶ Any patient, procedure, or medication can be tracked and reported; includes a recall module that incorporates preventive healthcare guidelines and user defined trackables
- ▶ 6 months of free support, including installation, training, technical assistance, and software updates with purchase
